

FLL PRELIMINARIES

NOTE on build instructions for mission items

FLL Preliminaries-Bin (4 garbage not 5).pdf:

- In the build instructions for the Bin (Dumpster) there are 4 white rim pieces and not 5 pieces pictured in the instructions.

Lego Building Instructions FLL Car.pdf:

- On pg. 6 of the build instructions, there is reference to two 3x2 blocks. The packages we gave you do not contain 3x2 blocks. Please instead use the 4x2 blocks for this step.
- On pg.4 of the build instructions, when attaching the 6x1 blocks please place these blocks one block back so that the pieces hang from the back by one of these units. You should then attach the 4x2 blocks referenced on page 6 to this hanging block.

UPDATED

FLL Preliminaries-See Saw.pdf:

- On pg.8 (step #7): The long thin piece is an axel. The instructions has the axel going through the middle of the long 15x1 black beams (so that there are 7 holes on either side). This is incorrect. Instead place the axel one hole backwards from the middle (so that there are 6 holes behind the axel and 8 in front). This new layout will make the See Saw a little longer and easier to use with the Bin.
