## Foreword

In this publication, the National Institute of Higher Education, Research, Science and Technology (NIHERST) presents the results of the Survey of Secondary School Middle Form Students, 2014. This study originated from NIHERST's participation in the Action Plan of Panama 2012-2016, OAS Working Group 2 which focuses on Human Resources, Training and Education.

The Survey of Secondary School Middle Form Students, 2014 was an enquiry of form three students (middle form students) in government, government-assisted and private secondary schools. The study focused on form three students because at this juncture of secondary education students usually select appropriate C.S.E.C. subjects to pursue their future career.

The major objective of this study is to compile benchmark data on students such as their desire to further their studies, factors that influence students' decision to study, their opinion and choice of scientific careers, and reasons for pursuing/not pursuing careers in science and technology. This undertaking will also examine students' attitudes towards science and technology and activities performed in science and mathematics classes.

This study will provide information on science education and the promotion of scientific and technological careers amongst school students. The results of this study are intended to assist decision-makers, researchers, teaching personnel and, in general, stakeholders in science education and communication.

NIHERST wishes to thank the Ministry of Education for approving the conduct of this study in secondary schools. We also acknowledge the co-operation of the principals and teachers from the government, government-assisted and private institutions in administering the questionnaires and the form three students who willingly provided the data collated in this report.

## Methodology

## Introduction

The empirical results of this study will provide information on science and mathematics education and the promotion of scientific and technological careers amongst school students. The results of this study are intended to assist decision-makers, researchers, teaching personnel and, in general, stakeholders in science education and communication. This methodology describes the objectives, scope, coverage, data collection and processing of the results of the survey.

## Objectives

The results of this study are intended to provide data on key education indicators necessary for the advancement of science and mathematics education, and also the promotion of scientific and technological careers amongst school students. This enquiry focused on:

- students' desire to further their studies,
- factors that influence students' decision to study,
- fields of study students were desirous of pursuing,
- reasons for pursuing/not pursuing careers in science and technology,
- opinion and choice of scientific careers,
- attitudes towards science and technology,
- activities performed in science and mathematics classes.

## Scope

The scope of this study included information on the demographic and social characteristics of secondary schools' form 3 students and their parents. The survey also examined students' desire to further their education, their attitudes towards science and mathematics, careers in science and mathematics, classroom and after-school activities, and home background.

## Coverage

The frame for the study was obtained from the Ministry of Education. It contained a total of 181 public and private secondary schools in the various educational districts of Trinidad and Tobago. Of the 181 secondary schools surveyed, 28, mainly private schools, were out of operation or did not conduct any form three classes. A representative sample of 79 schools, which included all form threes from each school, was selected to participate in the survey. The following table shows the number of selections and response rate by type of school.

## Response by Type of Secondary School

| Type of secondary <br> school | Total | No. <br> selected | No. <br> Responded | \% <br> Responded |
| :--- | :---: | :---: | :---: | :---: |
| Total | 153 | 79 | 78 | 99 |
| 1. Government | 89 | 46 | 45 | 98 |
| 2. Government-assisted | 42 | 22 | 22 | 100 |
| 3. Private | 22 | 11 | 11 | 100 |

## Sample Design

The list of secondary schools was divided into educational districts and then stratified by government, government-assisted and private schools; after which $50 \%$ of each stratum were chosen in random order. Through this process, a representative sample of five thousand, six hundred and twenty-six (5626) students from seventy-nine (79) public and private secondary schools responded to the enquiry.

## Data Collection

A questionnaire from the OAS Working Group 2 which was designed to achieve the survey objectives was amended for Trinidad and Tobago secondary schools' form three students. They were then delivered to the schools and subsequently monitored by a group of experienced interviewers. Data collection commenced in February, 2014 and was completed by April, 2014.

## Data Processing

As completed questionnaires were received, data were edited for consistency and omissions. Where discrepancies were identified, questionnaires were returned to the field for verification and correction as necessary. Edited data were then captured in the Statistical Package for the Social Sciences (SPSS) version 16.0 software which was used to produce the tabulations in this report.

## Results

The results of the survey are presented for the sample of respondents in the various tabulations and graphics which follow.

## Executive Summary

* Of the total sample of 5626 secondary schools form 3 students who participated in the survey, $55 \%$ were females and $45 \%$ were males. A review of the data by type of school shows an equal distribution of males and females in government-assisted and private schools while females (59\%) out-numbered their male counterparts (41\%) in the government schools.
* The modal age of form 3 students in general was 14 years ( $53 \%$ ) while $30 \%$ were 15 years of age. By type of school, a larger proportion (65\%) of students in governmentassisted schools were 14 years of age compared to their counterparts in government (47\%) and private (52\%) schools.
* The most popular subject amongst the form 3 secondary school students was Mathematics (21\%) followed by English Language (11\%) and Integrated Science (10\%).
* Mathematics (21\%) was the most popular subject amongst males followed by Integrated Science (10\%), English Language (8\%), IT (7\%) and Physics (6\%) while female students preferred Mathematics (21\%) followed by English Language (13\%), Integrated Science (11\%), Social Studies (6\%) and Visual Arts (6\%).
* The majority of students cited interest as the main reason they preferred a subject except in the case of Mathematics where the majority ( $49 \%$ ) indicated that it was challenging while one-third (34\%) found it interesting.
* The least preferred subject amongst the form 3 students was Spanish ( $25 \%$ ) followed by Mathematics (17\%). This pattern of responses was observed amongst all ages, gender and type of school.
* Difficulty and boredom to a lesser extent were identified as the main reasons subjects taught in form 3 of secondary schools were considered least preferred. Over a half of the students showed a lack of preference for Mathematics (73\%), Integrated Science (66\%), Chemistry (62\%), Spanish (60\%), Physics (55\%) and Technical Drawing (54\%) mostly because these subjects were too difficult. A substantial proportion of students who preferred English Language, Literature and the Social Sciences the least stated that the subjects were boring.
* A significant majority (88\%) of the sample of form 3 students expressed a desire to further their education after secondary school. By gender, a relatively larger proportion ( $92 \%$ ) among females was desirous of furthering their education compared to males (83\%).
* Of the students who expressed a desire to further their education, a substantial percentage ( $40 \%$ ), especially females ( $50 \%$ ), indicated that they would study Social Sciences and Humanities while $20 \%$ and $13 \%$ selected Natural Sciences, and Engineering and Technology respectively. Social Sciences and Humanities (27\%) were
also the most popular fields of study amongst male students followed by Engineering and Technology (23\%) and Natural Sciences (22\%).
* Two-thirds and more of the students stated that the ability to earn money (70\%), getting a job ( $68 \%$ ) and focusing on what they like doing and pursuing a fulfilling career ( $66 \%$ ), greatly influenced their decision to further their studies. The factors that least influenced students decision to further their studies were a desire to construct buildings, bridges and tools (43\%), invent technology (computers and programmes) (35\%) and friends' opinion (30\%).
* Students who did not wish to further their studies after secondary school identified that secondary education was sufficient (34\%), having to work right after school ( $26 \%$ ), and a lack of interest ( $25 \%$ ) as factors that greatly influenced their decision.
* A review of data of students desirous of furthering their education by their choice of profession shows that a higher percentage (28\%) of students, mainly among males ( $47 \%$ ), selected engineering while $26 \%$, especially females ( $32 \%$ ), wanted to become doctors. One-third (33\%) of the students were not interested in either of the S\&T professions as a scientific career. In terms of gender, a substantially larger proportion of the females (39\%) expressed this view compared to their male counterparts ( $24 \%$ ).
* Over $60 \%$ of the students agreed that each of the characteristics (see Table 20) described a scientist except being absent minded (11\%).
* Over a half of the form 3 students rated a scientist's job which most likely, entailed observation and laboratory experiments ( $70 \%$ ), was well paid ( $67 \%$ ), used theory and mathematics (55\%), demanded specialised training (54\%) and was creative and challenging (53\%).
* The majority of students assigned high ratings to various factors (see Table 22) that motivated a scientist to do his/her job, except having power and being famous, which scored 4 and 5 from $12 \%$ and $18 \%$ of the students respectively.
* A half ( $50 \%$ ) of the sample of form 3 secondary school students who participated in the survey were of the opinion that a scientific career attracted the youths of their generation while a quarter (24\%) disagreed and a similar percentage did not know (25\%).
* A substantial percentage of the sample of form 3 students agreed that S\&T made their lives easier and more comfortable ( $71 \%$ ), and also provided more job opportunities for future generations (50\%). A relatively large proportion disagreed that S\&T contributed to job losses (27\%), and would eliminate poverty and hunger globally ( $27 \%$ ).
* In general, over a half (57\%) of the students were of the opinion that S\&T brought many benefits while a quarter ( $25 \%$ ) believed it brought some benefits.
* One-third (32\%) of the students were of the opinion that S\&T brought some risks while $28 \%$ and $20 \%$ indicated that it brought many risks and few risks respectively; a negligible $2 \%$ believed that it brought no risk.
* One-third of the sample of secondary school form 3 students stated that outside of school hours they always looked at nature or animal life programmes or television documentaries (33\%), visited zoos and botanical gardens ( $32 \%$ ) and watched movies or read books and or magazines (comic strips, comics etc) on science fiction (30\%) while a quarter ( $24 \%$ ) always used the Internet to find scientific information. A large proportion of students never listened to radio programmes on S\&T (47\%), participated in science fairs, clubs and Olympiads (45\%), read scientific news in the daily papers ( $43 \%$ ) or read science magazines (43\%).
* An assessment of the performance of the sample of form 3 students in various subjects for the last academic year showed that over a half of the students who studied English Language (57\%), Art (55\%) and IT ( $53 \%$ ) indicated a 4 or 5 performance on the Likert scale. One-fifth ( $21 \%$ ) of the students stated that they performed excellent (5) in Mathematics while $23 \%$ and $27 \%$ assigned ratings of 4 and 3 respectively. With regards to the natural sciences, students stated that they performed relatively better in Biology with $47 \%$ assigning scores of 4 and 5 compared to Chemistry ( $42 \%$ ) and Physics ( $40 \%$ ). Students' performance rating in natural sciences was comparable to social sciences.
* A half or more of the form 3 students who participated in the survey agreed with the following statements on mathematics and science subjects: the majority of students could understand science topics if they were well explained (59\%); mathematics and science made students think about how to better care for their health ( $57 \%$ ); they were interesting (55\%); they made them think about how to better care for the environment (51\%); and they helped to clarify which profession to pursue in the future (50\%). Onethird (31\%) of the students were neutral to the statement on the school's science subjects were easy.
* The majority of students never performed any of the activities listed in Table 35 in their mathematics and science classes except using computers where accumulatively $50 \%$ indicated that they used it frequently. In addition, $30 \%$ and more of the students also assigned a combined rating of 4 and 5 to: view film projections ( $35 \%$ ); use laboratories ( $33 \%$ ); conduct experiments ( $32 \%$ ); and use the library (30\%).
* Students were asked to rate the importance of various activities in their mathematics and science classes. A substantial percentage of students stated that using computers ( $55 \%$ ), conducting experiments ( $51 \%$ ) and laboratories (51\%) were important activities in their mathematics and science classes.
* Three-fifths of the students had relatives or close friends who were doctors (61\%) and engineers ( $61 \%$ ). A smaller proportion of students had relatives or close friends who were scientists ( $16 \%$ ) and science professors (14\%).
* One-third (32\%) of the parents of form 3 students in all schools attained secondary education as their highest level of educational attainment. Thirty percent (30\%) of the parents had achieved tertiary education, especially parents of students in state-assisted schools where two-fifths of the fathers (39\%) and mothers (40\%) attained this level of education.
* In general, the majority of form 3 students indicated that their houses possessed most of the essential household items. With respect to ICT, a significant percentage of the students stated that their households had a laptop/notebook (87\%), Internet connection (79\%) and desktop computer (72\%).

Table 1: Distribution of Students by Type of School and Gender

| Type of school | Gender |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total |  | Male |  | Female |  | Not stated |  |
|  | No. | $\%$ | No. | $\%$ | No. | $\%$ | No. | $\%$ |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ | $(7)$ | $(8)$ |
| All schools | 5626 | 100 | 2514 | 45 | 3097 | 55 | 15 | 0 |
| Government | 3093 | 100 | 1272 | 41 | 1811 | 59 | 10 | 0 |
| Government-assisted | 1915 | 100 | 932 | 49 | 979 | 51 | 4 | 0 |
| Private | 618 | 100 | 310 | 50 | 307 | 50 | 1 | 0 |

The table above shows the distribution of the sample of form 3 students who participated in the survey by gender and type of school. Of the total sample of 5626 students, over a half ( $55 \%$ ) were females while $45 \%$ were males. A review of the data by type of school shows an equal distribution of males and females in government-assisted and private schools while females (59\%) out-numbered their male counterparts (41\%) in the government schools.

Source: Table 1

Table 2: Percentage of Students by Age and Type of School

| Type of school | Age (years) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | 13 | 14 | 15 | 16 and over | Not stated |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ |
| All schools |  |  |  |  |  |  |
| Government | 100 | 6 | 53 | 30 | 10 |  |
| Government-assisted | 100 | 6 | 47 | 33 | 13 | 1 |
| Private | 100 | 6 | 65 | 24 | 5 | 2 |
|  | 100 | 5 | 52 | 30 | 11 | 1 |

In terms of age distribution, the modal age of form 3 students was 14 years ( $53 \%$ ) while $30 \%$ were 15 years of age. By type of school, a larger proportion (65\%) of students in government-assisted schools were 14 years of age compared to their counterparts in government (47\%) and private (52\%) schools. Approximately one-third of the students in government (33\%) and private (30\%) secondary schools were 15 years old compared to a quarter (24\%) in the government-assisted schools.

| Geography | 2 | 2 | 2 | 0 |
| Spanish | 4 | 4 | 4 | 4 |
| French | 2 | 1 | 3 | 1 |
| Food and Nutrition | 1 | 1 | 0 | 0 |
| Home Economic Management | 1 | 1 | 0 | 2 |
| Technical Drawing | 1 | 1 | 1 | 0 |
| Building Technology - Woods | 0 | 1 | 0 | 0 |
| Mechanical Engineering | 1 | 1 | 0 | 0 |
| Visual Arts | 6 | 6 | 6 | 3 |
| Theatre Arts | 2 | 2 | 2 | 2 |
| Music | 3 | 3 | 2 | 4 |
| Physical Education | 3 | 3 | 2 | 3 |
| Principles of Accounts | 1 | 0 | 1 | 5 |
| Principles of Business | 2 | 1 | 2 | 3 |
| Other | 1 | 1 | 1 | 2 |
| Do not know | 5 | 4 | 6 | 4 |
| Not stated | 1 | 1 | 1 | 1 |

By type of school, Mathematics was observed as the most popular of all subjects. A higher percentage ( $24 \%$ ) among form 3 students in government secondary schools indicated that they preferred Mathematics compared to $19 \%$ and $16 \%$ in government-assisted and private schools respectively. However, natural sciences were the preferred choice of an average of $6 \%$ of form 3 students in government-assisted and private schools.

The table above shows a list of subjects students preferred the most and the reasons for such preference. For each of the subjects listed above the majority of students cited interest as the main reason they preferred the subject except in the case of Mathematics where the majority (49\%) indicated that it was challenging while one-third (34\%) found it interesting.

Table 7: Percentage of Students by Least Preferred Subject and Age

Difficulty and boredom to a lesser extent were identified as the main reasons subjects taught in form 3 of secondary schools were considered least preferred. The data reveal that over a half of the students showed a lack of preference for Mathematics (73\%), Integrated Science (66\%), Chemistry (62\%), Spanish (60\%), Physics ( $55 \%$ ) and Technical Drawing ( $54 \%$ ) mostly because these subjects were too difficult. A substantial proportion of students who preferred English Language, Literature and the Social Sciences the least stated that the subjects were boring.

Table 11: Percentage of Students Desirous of Furthering their Education by Gender

| Desirous of furthering education | Gender |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Total | Male | Female | Not stated |  |
| Total | $(1)$ | $(2)$ | $(3)$ | $(4)$ |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

A significant majority ( $88 \%$ ) of the sample of form 3 students expressed a desire to further their education after secondary school. By gender, a relatively larger proportion (92\%) among females was desirous of furthering their education compared to males (83\%) (Table 11). A review of the data by type of school shows that the highest percentage ( $91 \%$ ) of students desirous of furthering their education was in government-assisted schools followed by private schools (90\%) and government schools (86\%) (Table 12).

| Not stated | 2 | 3 | 2 | 7 |  |

Of the students who expressed a desire to further their education, a substantial percentage (40\%), especially females ( $50 \%$ ), indicated that they would study Social Sciences and Humanities while $20 \%$ and $13 \%$ selected Natural Sciences, and Engineering and Technology respectively (Table 13). Social Sciences and Humanities ( $27 \%$ ) were also the most popular fields of study amongst male students followed by Engineering and Technology (23\%) and Natural Sciences (22\%). A similar trend in students' participation in further studies in various fields was observed in all types of school (Table 14).

Table 15: Factors that Influenced Students' Decision to Further their Studies

Table 15 represents the sample of form 3 students who responded to factors that influenced their decision to further their studies. Two-thirds and more of the students stated that the ability to earn money (70\%), getting a job (68\%) and focusing on what they like doing and pursue a fulfilling career (66\%), greatly influenced (5) their decision to further their studies. Additionally, a substantial percentage of students reported that the following factors greatly influenced their decision to further their studies: subject outlines (51\%), ability to express creativity (44\%), gain knowledge (41\%), prestige (36\%), friends furthering their studies ( $32 \%$ ) and contribution to society's development (30\%). The factors that least influenced students decision to further their studies were a desire to construct buildings, bridges and tools (43\%), invent technology (computers and programmes) (35\%) and friends' opinion (30\%).

Table 16: Factors that Influenced Students' Decision not to Further their Studies

In general, a higher percentage of students who did not wish to further their studies after secondary school indicated that the factors above: especially their parents did not consider studying as very important (60\%); their family had no money to continue studying (50\%); they did not need to study to get a good job (47\%); their parents did not study and life turned out well for them (41\%) and; even if they studied they will not get a good job (40\%), had no influence on their decision. However, that secondary education was sufficient (34\%), having to work right after school (26\%), and a lack of interest ( $25 \%$ ) were rated as deciding factors of great influence.

Table 17: Percentage of Students Interested in Scientific Professions by Gender

| Profession | Gender |  |  |
| :--- | :---: | :---: | :---: |
|  | Total | Male | Female |
|  | $(1)$ | $(2)$ | $(3)$ |
|  | (percentage of students) |  |  |
|  | 14 | 16 | 12 |
| Engineer | 26 | 17 | 32 |
| Science professor | 28 | 47 | 15 |
| None | 4 | 5 | 4 |
| Do not know | 33 | 24 | 39 |

Table 18: Percentage of Students Interested in Scientific Professions by Type of School

| Profession | Type of school |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  |  |  | Total | Government | Government - <br> assisted |
|  | $(1)$ | $(2)$ | Private |  |
|  |  | $(3)$ | $(4)$ |  |

| Science professor | 4 | 26 | 5 | 6 |
| None | 33 | 4 | 29 | 35 |
| Do not know | 9 | 35 | 9 | 6 |

The tables above show the percentage of students desirous of furthering their education by their choice of profession. A higher percentage ( $28 \%$ ) of students, mainly males ( $47 \%$ ), selected engineering while $26 \%$, especially females ( $32 \%$ ), wanted to become doctors (Table 17). One third ( $33 \%$ ) of the students were not interested in either of the professions as a scientific career. In terms of gender, a substantially larger proportion of the females (39\%) expressed this view compared to their male counterparts ( $24 \%$ ). By type of school, students in state-assisted schools were generally more interested in becoming scientists (17\%), doctors (28\%) and engineers (33\%) compared to their counterparts in state and private schools (Table 18). A substantial percentage of students did not indicate an area of study for each of the selected professions (Table 19).

| 8 | An intense job, with long hours | 100 | 8 | 7 | 16 | 19 | 41 | 6 | 2 |
| 9 | Teamwork | 100 | 9 | 9 | 20 | 17 | 35 | 6 | 4 |
| 10 | An isolated/solitary job | 100 | 14 | 12 | 22 | 15 | 20 | 13 | 4 |
| 11 | A well paid job | 100 | 3 | 2 | 7 | 14 | 67 | 6 | 2 |
| 12 | A stable job | 100 | 5 | 5 | 14 | 20 | 45 | 8 | 3 |
| 13 | A job that claims to know the world best | 100 | 6 | 6 | 17 | 20 | 40 | 8 | 3 |
| 14 | A job with practical results in persons' lives and in society | 100 | 6 | 7 | 18 | 21 | 36 | 10 | 2 |
| 15 | A job like any other | 100 | 33 | 15 | 16 | 9 | 14 | 9 | 3 |
| 16 | Other | 100 | 2 | 1 | 1 | 1 | 5 | 16 | 74 |

Over a half of the form 3 students rated a scientist's job which most likely, entailed observation and laboratory experiments ( $70 \%$ ), was well paid ( $67 \%$ ), used theory and mathematics (55\%), demanded specialised training (54\%) and was creative and challenging (53\%). One-third (33\%) of the students indicated that a scientist's job was hardly one like any other or independent/stand alone (20\%).

Table 22: Factors that Motivate a Scientist to do His/Her Job

| 4 To have an intellectually stimulating job | 100 | 3 | 4 | 13 | 22 | 47 | 9 | 3 |
| 5 To earn money | 100 | 4 | 4 | 12 | 15 | 57 | 6 | 3 |
| 6 To conduct surveys, interviews or investigations in a lab and discover or invent new things | 100 | 5 | 4 | 13 | 17 | 50 | 7 | 3 |
| 7 To win awards | 100 | 10 | 12 | 23 | 17 | 26 | 8 | 4 |
| 8 To heighten the scientific reputation among his/her colleagues | 100 | 6 | 7 | 22 | 20 | 31 | 10 | 4 |
| 9 To contribute to the advance of knowledge | 100 | 2 | 3 | 10 | 20 | 56 | 5 | 4 |
| 10 To progress in his/her professional career | 100 | 3 | 3 | 11 | 20 | 54 | 6 | 4 |
| 11 To have power and be famous | 100 | 20 | 16 | 21 | 12 | 18 | 10 | 4 |
| 12 To satisfy his/her curiosity | 100 | 4 | 6 | 16 | 22 | 41 | 8 | 4 |
| 13 To work with capable persons | 100 | 6 | 7 | 20 | 20 | 33 | 10 | 5 |
| 14 Other | 100 | 2 | 1 | 2 | 2 | 5 | 16 | 73 |

The students were asked to rate how the various factors above motivated a scientist to do his/her job. The majority of students assigned high ratings to each of the factors, except having power and being famous, which scored 4 and 5 from $12 \%$ and $18 \%$ of the students respectively.

Table 23: Students' Opinion of Youths of their Generation Attracted to a Scientific Career

| Students | Youths attracted to a scientific career |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Do not know | Not stated |  |  |  |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ |  |  |  |
| Total |  |  |  |  |  |  | (percentage of students) |  |
| Male | 100 | 50 | 24 | 25 | 1 |  |  |  |
| Female | 100 | 50 | 23 | 26 | 1 |  |  |  |
| Not stated | 100 | 50 | 25 | 24 | 1 |  |  |  |

A half (50\%) of the sample of form 3 secondary school students who participated in the survey were of the opinion that a scientific career attracted the youths of their generation while a quarter (24\%) disagreed and a similar percentage did not know (25\%) (Table 23). A similar pattern of responses was recorded within both genders. An examination of the data by type of school shows that a larger percentage ( $56 \%$ ) of students in government-assisted schools agreed that a scientific career attracted the youths of their generation compared to their counterparts in the government ( $47 \%$ ) and private ( $44 \%$ ) schools (Table 24).

Table 24: A Scientific Career Attracted the Youths of their Generation by Type of School

| Type of school | A scientific career attracted youths |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Do not know | Not stated |  |  |  |  |  |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ |  |  |  |  |  |
|  |  |  |  |  |  |  | (percentage of students) |  |  |  |
|  | 100 | 50 | 25 | 25 | 1 |  |  |  |  |  |
|  | 100 | 47 | 26 | 26 | 1 |  |  |  |  |  |
| Private | 100 | 56 | 20 | 23 | 1 |  |  |  |  |  |
|  | 100 | 44 | 30 | 24 | 2 |  |  |  |  |  |

Table 25: Reasons why a Scientific Career was Attractive to Some Youths

| Reason | Total | Yes | NoNot <br> stated |  |
| :--- | :---: | :---: | :---: | :---: |
|  | (1) <br> (percentage of students) <br> $(4)$ |  |  |  |
| 1 To travel to other countries | 100 |  | 87 | 12 |
| 2 To work with new technologies | 100 | 94 | 5 | 0 |
| 3 To increase your knowledge | 100 | 94 | 5 | 0 |
| 4 To help solve mankind's problems | 100 | 86 | 13 | 0 |
| 5 To have an intellectually stimulating and not boring job | 100 | 81 | 18 | 1 |
| 6 To contribute to the advance of knowledge | 100 | 92 | 7 | 1 |
| 7 To work with highly qualified persons | 100 | 83 | 16 | 1 |
| 8 To have a socially prestigious job | 100 | 79 | 20 | 1 |
| 9 To discover or construct new things | 100 | 92 | 8 | 0 |
| 10 To have a good salary | 100 | 91 | 9 | 1 |
| 11 To help in the country's development | 100 | 83 | 16 | 1 |
| 12 Other | 100 | 12 | 79 | 9 |
| 13 Do not know | 100 | 1 | 95 | 4 |

Of the $50 \%$ of the students who agreed that a scientific career was attractive to the youths of their generation, a significant majority responded affirmatively to each of the reasons cited above.

Table 26: Reasons why a Scientific Career was Unattractive to Some Youths

| Reason | Total | Yes | No | Not <br> stated |
| :--- | :---: | :---: | :---: | :---: |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ |
| (percentage of |  |  |  |  |
| They prefer other professional careers | students) |  |  |  |
| 2 Science is boring | 100 | 89 | 9 | 2 |
| 3 Science is too challenging | 100 | 61 | 37 | 2 |
| 4 They prefer a job with more regular hours | 100 | 83 | 15 | 2 |
| 5 As a scientist it's hard to become famous | 100 | 76 | 22 | 2 |
| 6 Scientists do not earn good salaries | 100 | 44 | 53 | 2 |
| 7 There are few job opportunities as a scientist | 100 | 25 | 72 | 3 |
| 8 Jobs in this field are not stable | 100 | 53 | 45 | 2 |
| 9 They would not like to study indefinitely | 100 | 41 | 56 | 3 |
| 10 They would have to go abroad to get a good job | 100 | 70 | 27 | 3 |
| 11 Currently scientific investigation is too dependent on economic | 100 | 55 | 43 | 2 |
| objectives | 100 | 56 | 42 | 2 |
| 12 Other | 100 | 9 | 83 | 7 |
| 13 Do not know | 100 | 1 | 96 | 3 |

The table above shows the students who indicated that a scientific career was unattractive to youths and their responses to a list of reasons. The majority of students gave positive responses to each of the reasons listed above except: as a scientist it was hard to become famous (44\%); jobs in this field were not stable (41\%) and; scientists did not earn good salaries ( $25 \%$ ).

Table 27: Agreement with Statements about Science and Technology (S\&T)

| Statement | Agree/Disagree |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Scale: 1 = strongly disagree to $5=$ strongly agree |  |  |  |  |  |  |  |
|  | Total | 1 | 2 | 3 | 4 | 5 | Do not know | Not stated |
|  | (1) |  |  |  |  |  |  | (8) |
|  | (percentage of students) |  |  |  |  |  |  |  |
| $1 \mathrm{~S} \mathrm{\& T}$ are making our lives easier and more comfortable. | 100 | 5 | 3 | 11 | 13 | 58 | 5 | 5 |
| 2 Applied S\&T contribute to loss of job positions. | 100 | 15 | 12 | 25 | 15 | 14 | 16 | 2 |
| $3 \mathrm{~S} \mathrm{\& T}$ will eliminate poverty and hunger in the world. | 100 | 16 | 11 | 23 | 13 | 15 | 15 | 7 |
| $4 \mathrm{~S} \& \mathrm{~T}$ are responsible for the majority of environmental problems that we face currently. | 100 | 11 | 11 | 22 | 15 | 20 | 14 | 6 |
| 5 Thanks to S\&T we will have more job opportunities for future generations. | 100 | 7 | 8 | 18 | 19 | 31 | 12 | 6 |
| 6 S\&T are producing an artificial and inhumane lifestyle. | 100 | 11 | 9 | 21 | 14 | 22 | 17 | 6 |

A substantial percentage of the sample of form 3 students agreed (4+5) that S\&T made their lives easier and more comfortable (71\%), and also provided more job opportunities for future generations (50\%). A relatively large proportion disagreed that $S \& T$ contributed to job losses (27\%), and would eliminate poverty and hunger globally (27\%).

Table 28: Benefits of Science and Technology (S\&T) by Gender

| Gender | Benefits of S\&T |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Many <br> benefits | Some <br> benefits | Few <br> benefits | No benefit | Do not <br> know | Not <br> stated |  |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ | $(7)$ |  |
| Total |  |  |  |  |  |  |  | (percentage of students) |
| Male | 100 | 57 | 25 | 5 | 1 | 10 | 3 |  |
| Female | 100 | 58 | 24 | 4 | 1 | 10 | 4 |  |
| Not stated | 100 | 55 | 26 | 5 | 1 | 10 | 3 |  |

In general, over a half (57\%) of the students were of the opinion that S\&T brought many benefits while a quarter ( $25 \%$ ) believed it brought some benefits. A similar pattern of responses was observed within each gender (Table 28). By type of school a slightly higher percentage of form 3 students in private ( $62 \%$ ) and government-assisted (60\%) secondary schools indicated that S\&T brought many benefits compared to state schools (53\%) (Table 29).

Table 29: Benefits of Science and Technology (S\&T) by Type of School

| Type of school | Benefits of S\&T |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Many <br> benefits | Some <br> benefits | Few <br> benefits | No benefit | Do not <br> know | Not <br> stated |  |  |  |  |  |  |
|  | $(1)$ | $(2)$ | $(3)$ |  |  |  |  |  |  | $(4)$ | $(5)$ | $(6)$ | $(7)$ |
| Total |  | (percentage of students) |  |  |  |  |  |  |  |  |  |  |  |
| Government | 100 | 57 | 25 | 5 | 1 | 10 | 3 |  |  |  |  |  |  |
| Government-assisted | 100 | 53 | 25 | 5 | 1 | 12 | 4 |  |  |  |  |  |  |
| Private | 100 | 60 | 26 | 4 | 1 | 7 | 2 |  |  |  |  |  |  |
|  | 100 | 62 | 22 | 4 | 0 | 8 | 3 |  |  |  |  |  |  |

Table 30: Risks of S\&T

| Students | Risks of S\&T |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Many <br> risks | Some <br> risks | Few <br> risks | No risk | Do not <br> know | Not <br> stated |  |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ | $(7)$ |  |
| Total |  | (percentage of students) |  |  |  |  |  |  |
| Male | 100 | 28 | 32 | 20 | 2 | 14 | 4 |  |
| Female | 100 | 29 | 33 | 19 | 2 | 13 | 4 |  |
| Not stated | 100 | 28 | 32 | 20 | 1 | 14 | 4 |  |

One-third (32\%) of the students were of the opinion that S\&T brought some risks while $28 \%$ and $20 \%$ indicated that it brought many risks and few risks respectively; a negligible $2 \%$ believed that it brought no risk. This pattern of response was observed within both gender (Table 30) and by type of school (Table 31).

Table 31: Risks of S\&T by Type of School

| Type of school | Risks of S\&T |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Many risks | Some risks | Few <br> risks | No risk | Do not know | Not stated |
|  | (1) | (2) | (3) | (4) | (5) | (6) | (7) |

|  | (percentage of students) |  |  |  |  |  |  |  |
| 1 I look at programmes and documentaries on S\&T | 100 | \|29 | 15 | 21 | 12 | 16 | 4 | 4 |
| 2 I listen to radio programmes on S\&T | 100 | 47 | 18 | 14 | 6 | 8 | 4 | 3 |
| 3 I read scientific news in the daily papers | 100 | 43 | 16 | 17 | 8 | 9 | 3 | 4 |
| 4 I read science magazines | 100 | 43 | 14 | 16 | 10 | 11 | 3 | 3 |
| 5 I read scientific books | 100 | 31 | 13 | 18 | 14 | 17 | 3 | 4 |
| 6 I look at nature or animal life programmes or TV documentaries | 100 | 13 | 10 | 19 | 19 | 33 | 3 | 4 |
| 7 I use the Internet to find scientific information | 100 | 20 | 13 | 19 | 16 | 24 | 3 | 4 |
| 8 I visit museums, centres or expos on S\&T | 100 | 34 | 19 | 17 | 10 | 13 | 4 | 4 |
| 9 I discuss science related topics with my friends | 100 | 34 | 17 | 18 | 12 | 12 | 3 | 4 |
| 10 I participate in science fairs, clubs and Olympiads | 100 | 45 | 14 | 14 | 8 | 11 | 3 | 4 |
| 11 I visit zoos and botanical gardens | 100 | 11 | 11 | 20 | 19 | 32 | 3 | 4 |
| 12 I discuss environmental topics with my friends | 100 | 32 | 18 | 19 | 11 | 13 | 4 | 4 |
| 13 I watch movies or read books and or magazines (comic strips, comics etc) on science fiction | 100 | 21 | 12 | 16 | 14 | 30 | 4 | 4 |

One-third of the sample of secondary school form 3 students stated that outside of school hours they always looked at nature or animal life programmes or television documentaries (33\%), visited zoos and botanical gardens ( $32 \%$ ) and watched movies or read books and or magazines (comic strips, comics etc) on science fiction (30\%) while a quarter ( $24 \%$ ) always used the Internet to find scientific information. A large proportion of students never listened to radio programmes on S\&T (47\%), participated in science fairs, clubs and Olympiads ( $45 \%$ ), read scientific news in the daily papers ( $43 \%$ ) or read science magazines (43\%).

Table 33: Percentage of Students by Subjects and Performance in the Last Academic Year

| Subject | Performance |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Scale: 1 = very bad to 5 = excellent |  |  |  |  |  |  |
|  | Total | 1 | 2 | 3 | 4 | 5 | Not stated |
|  | (1) | (2) | (3) | (4) | (5) | (6) | (7) |
|  | (percentage of students) |  |  |  |  |  |  |
| English Language | 100 | 4 | 7 | 29 | 34 | 23 | 3 |
| Mathematics | 100 | 9 | 16 | 27 | 23 | 21 | 3 |
| Physics | 100 | 12 | 16 | 27 | 21 | 19 | 5 |
| Chemistry | 100 | 13 | 15 | 25 | 22 | 20 | 5 |
| Biology | 100 | 10 | 13 | 24 | 24 | 23 | 6 |
| Information Technology (IT) | 100 | 9 | 11 | 22 | 24 | 29 | 5 |
| Geography | 100 | 9 | 13 | 25 | 25 | 21 | 6 |
| History | 100 | 12 | 13 | 25 | 22 | 23 | 5 |
| Arts (visual and performing arts) | 100 | 8 | 11 | 22 | 25 | 30 | 5 |

Table 33 shows the performance of the sample of form 3 students in various subjects for the last academic year. Over a half of the students who studied English Language (57\%), Art (55\%) and IT (53\%) indicated a 4 or 5 performance on the Likert scale. One-fifth (21\%) of the students stated that they performed excellent (5) in Mathematics while $23 \%$ and $27 \%$ assigned ratings of 4 and 3 respectively. With regards to the natural sciences, students stated that they performed relatively better in Biology with $47 \%$ assigning scores of 4 and 5 compared to Chemistry (42\%) and Physics (40\%). Students' performance rating in natural sciences was comparable to social sciences.

Table 34: Agreement with Statements Regarding Mathematics and Science Subjects

| Statement | Agree/Disagree |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Scale: $1=$ strongly disagree to $5=$ strongly agree |  |  |  |  |  |  |  |
|  | Total | 1 | 2 | 3 | 4 | 5 | Do not know | Not stated |
|  | (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
|  | (percentage of students) |  |  |  |  |  |  |  |
| 1 The school's science subjects are easy for me. | 100 | 16 | 13 | 31 | 19 | 13 | 4 | 4 |
| 2 They are interesting. | 100 | 9 | 9 | 20 | 21 | 34 | 3 | 4 |
| 3 They increase my appreciation for nature. | 100 | 11 | 13 | 23 | 20 | 24 | 5 | 4 |
| 4 They help me in my daily life. | 100 | 11 | 14 | 23 | 20 | 23 | 4 | 4 |
| 5 They make me think about how to better care for my health. | 100 | 8 | 3 | 19 | 23 | 34 | 4 | 10 |
| 6 They make me think about how to better care for the environment. | 100 | 9 | 10 | 22 | 22 | 29 | 4 | 4 |
| 7 The majority of students can understand science topics if they are well explained. | 100 | 7 | 8 | 18 | 21 | 38 | 5 | 4 |
| 8 Science classes increase my liking to study. | 100 | 16 | 13 | 20 | 17 | 24 | 5 | 5 |
| 9 They help to clarify which profession I would like to pursue in the future. | 100 | 14 | 9 | 16 | 16 | 34 | 7 | 5 |

A half or more of the form 3 students who participated in the survey agreed(4+5) with the following statements on mathematics and science subjects: the majority of students could understand science topics if they were well explained (59\%); mathematics and science made students think about how to better care for their health (57\%); they were interesting ( $55 \%$ ); they made them think about how to better care for the environment (51\%); and they helped to clarify which profession to pursue in the future (50\%). One-third (31\%) of the students were neutral to the statement on the school's science subjects were easy.

Table 35: Activities Performed in Mathematics and Science Classes

| Activity | Performance |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Scale: 1 = never to 5 = always |  |  |  |  |  |  |  |
|  | Total | 1 | 2 | 3 | 4 | 5 | Do not know | Not stated |
|  | (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
|  | (percentage of students) |  |  |  |  |  |  |  |
| 1 Use the library | 100 | 28 | 14 | 22 | 13 | 17 | 2 | 4 |
| 2 Use labs | 100 | 22 | 15 | 21 | 15 | 18 | 3 | 5 |
| 3 Conduct experiments | 100 | 29 | 16 | 22 | 16 | 16 | 3 | 1 |
| 4 Use computers | 100 | 18 | 10 | 14 | 15 | 35 | 3 | 5 |
| 5 View film projections | 100 | 23 | 14 | 19 | 16 | 19 | 3 | 6 |
| 6 Visit museums, go on excursions or study trips | 100 | 39 | 15 | 15 | 10 | 13 | 3 | 5 |
| 7 Visit a lab or institution of scientific investigation | 100 | 39 | 15 | 16 | 9 | 11 | 4 | 6 |
| 8 Make presentations on how S\&T affect society | 100 | 38 | 15 | 17 | 10 | 10 | 5 | 5 |
| 9 Prepare displays for science fairs | 100 | 45 | 15 | 13 | 9 | 11 | 4 | 3 |
| 10 Use newspaper articles on S\&T to work on topics in class | 100 | 45 | 13 | 12 | 8 | 11 | 5 | 6 |

Table 35 shows a list of activities and the frequency at which they were performed in form 3 mathematics and science classes. The majority of students never performed any of the above activities in their mathematics and science classes except using computers where accumulatively $50 \%(4+5)$ indicated that they used it frequently. In addition, $30 \%$ and more of the students also assigned a combined rating of 4 and 5 to: view film projections ( $35 \%$ ); use laboratories ( $33 \%$ ); conduct experiments ( $32 \%$ ); and use the library ( $30 \%$ ).

Table 36: Importance of Various Activities in Mathematics and Science Classes

| Activity | Importance |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Scale: 1 = not important to 5 = very important |  |  |  |  |  |  |  |
|  | Total | 1 | 2 | 3 | 4 | 5 | Do not know | Not stated |
|  | (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
|  | (percentage of students) |  |  |  |  |  |  |  |
| 1 Use the library | 100 | 19 | \|10 | 19 | 13 | 26 | 4 | 10 |
| 2 Use labs | 100 | 11 | 9 | 15 | 16 | 35 | 4 | 10 |
| 3 Conduct experiments | 100 | 11 | 8 | 16 | 15 | 36 | 4 | 10 |
| 4 Use computers | 100 | 9 | 7 | 15 | 16 | 39 | 4 | 10 |
| 5 View film projections | 100 | 14 | 10 | 19 | 17 | 26 | 5 | 11 |
| 6 Visit museums, go on excursions or study trips | 100 | 17 | 10 | 16 | 15 | 27 | 5 | 11 |
| 7 Visit a lab or institution of scientific investigation | 100 | 17 | 9 | 16 | 14 | 28 | 5 | 11 |
| 8 Make presentations on how S\&T affect society | 100 | 18 | 11 | 18 | 15 | 21 | 6 | 11 |
| 9 Prepare displays for science fairs | 100 | 21 | 11 | 16 | 14 | 21 | 6 | 11 |
| 10 Use newspaper articles on S\&T to work on topics in class | 100 | 22 | 11 | 16 | 12 | 21 | 7 | 11 |

Students were asked to rate the importance of the activities listed above in their mathematics and science classes on a five point scale where I indicated not important and 5 indicated very important. A substantial percentage of students stated that using computers (55\%), conducting experiments (51\%) and laboratories $(51 \%)$ were important $(4+5)$ activities in their mathematics and science classes. Additionally, a relatively large proportion of the students rated viewing film projections (43\%), visiting museums, and excursions or study trips ( $42 \%$ ), visiting a laboratory or institution of scientific investigation ( $42 \%$ ) and the library (39\%) as important activities.

Table 37: Name of a Local or Foreign S\&T Institution by Gender

| Student | Name of S\&T institution |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Not stated |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ |
| Total | (percentage of students) |  |  |  |
| Male | 100 | 15 | 81 | 4 |
| Female | 100 | 15 | 81 | 5 |
| Not stated | 100 | 16 | 81 | 3 |

Table 38: Name of a Local or Foreign S\&T Institution by Type of School

| Type of school | Name of S\&T institution |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Not stated |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ |
| Total | (percentage of students) |  |  |  |
| Government | 100 | 15 | 81 | 4 |
| Government - assisted | 100 | 11 | 85 | 4 |
| Private | 100 | 21 | 76 | 3 |

The survey results reveal that only a small percentage (15\%) of the students was able to name a local or foreign S\&T institution. A similar pattern of responses was observed by gender (Table 37). A further review of the data by type of school shows that one-fifth of the students in government-assisted (21\%) and private ( $20 \%$ ) schools were able to recall the name of an S\&T institution compared to $11 \%$ in government schools (Table 38). The local institutions mainly identified were The University of the West Indies (UWI), The University of Trinidad and Tobago (UTT) and National Institute of Higher Education, Research, Science and Technology (NIHERST) while the most cited foreign S\&T institutions were National Aeronautics and Space Administration (NASA), Massachusetts Institute of Technology (MIT) and ITT Technical Institute.

Table 39: Name of a Local or Foreign Scientist

| Student | Name of a scientist |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Not stated |  |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ |  |
| Total | (percentage of students) |  |  |  |  |
| Male | 100 | 10 | 86 | 4 |  |
| Female | 100 | 10 | 85 | 5 |  |
| Not stated | 100 | 10 | 87 | 3 |  |

Table 40: Name of a Local or Foreign Scientist by Type of School

| Type of school | Name of a scientist |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Not stated |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ |
| Total | (percentage of students) |  |  |  |
| Government | 100 | 10 | 86 | 4 |
| Government - assisted | 100 | 6 | 90 | 4 |
| Private | 100 | 16 | 81 | 3 |

The data show that only $10 \%$ of the sample of form three students were able to recall the name of a local or foreign scientist. A similar pattern of responses was observed by gender (Table 39). Data by type of school reveal a higher percentage of students in government-assisted (16\%) and private ( $12 \%$ ) schools who were able to name a scientist compared to students in government schools (6\%) (Table 40). The local scientists mainly identified were Dr. Joseph Lennox Pawan, Dr. Rudranath Capildeo and Professor Courtenay Bartholomew while the most cited foreign scientists were Albert Einstein, Sir Isaac Newton and Stephen William Hawking.

Table 41: Relatives or Close Friends in Specific S\&T Professions

| S\&T profession | Have relatives or close friends |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Do not know | Not stated |  |
|  | $(1)$ |  | $(2)$ | $(3)$ | $(4)$ | $(5)$ |
| Doctor | (percentage of students) |  |  |  |  |  |
| Science professor | 100 | 61 | 21 | 12 | 6 |  |
| Scientist | 100 | 14 | 60 | 20 | 6 |  |
| Engineer | 100 | 16 | 58 | 20 | 6 |  |

The table above shows the percentage of students with relatives or close friends in the S\&T occupations. Three-fifths of the students had relatives or close friends who were doctors (61\%) and engineers (61\%). A smaller proportion of students had relatives or close friends who were scientists (16\%) and science professors (14\%).

Table 42: Educational Attainment of Parents by Type of School

| Educational attainment | Type of school |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total |  | Government |  | Government assisted |  | Private |  |
|  | Father | Mother | Father | Mother | Father | Mother | Father | Mother |
|  | (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
|  | (percentage) |  |  |  |  |  |  |  |
| Total | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 |
| None | 2 | 1 | 2 | 1 | 1 | 1 | 3 | 2 |
| Primary | 7 | 6 | 9 | 8 | 4 | 4 | 6 | 4 |
| Secondary | 32 | 33 | 33 | 33 | 31 | 33 | 32 | 30 |
| Tertiary | 30 | 34 | 25 | 28 | 39 | 40 | 33 | 40 |
| Do not know | 19 | 16 | 21 | 18 | 16 | 14 | 19 | 16 |
| Not stated | 10 | 10 | 11 | 11 | 9 | 9 | 7 | 8 |

One-third (32\%) of the parents of form 3 students in all schools attained secondary education as their highest level of educational attainment. Thirty percent (30\%) of the parents had achieved tertiary education, especially parents of students in government-assisted schools where two-fifths of the fathers (39\%) and mothers (40\%) attained this level of education.

Table 43: Employment Status of Parents by Type of School

| Employment status | Type of school |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total |  | Government |  | Government <br> assisted |  | Private |  |
|  | Father | Mother | Father | Mother | Father | Mother | Father | Mother |
|  | $(1)$ | $(2)$ | $(3)$ | $(4)$ | $(5)$ | $(6)$ | $(7)$ | $(8)$ |
| Total |  |  |  | (percentage) |  |  |  |  |
| Employed | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 |
| Self-employed | 58 | 51 | 56 | 50 | 62 | 52 | 56 | 55 |
| Unemployed | 22 | 14 | 21 | 13 | 24 | 16 | 26 | 15 |
| Student | 1 | 0 | 2 | 0 | 1 | 0 | 2 | 1 |
| Retired | 0 | 1 | 0 | 1 | 0 | 1 | 0 | 1 |
| Home duties | 2 | 1 | 2 | 1 | 2 | 1 | 3 | 0 |
| Do not know | 0 | 20 | 1 | 19 | 0 | 22 | 0 | 18 |
| Not stated | 6 | 4 | 8 | 5 | 3 | 2 | 6 | 2 |

Table 43 shows the distribution of parents of the form 3 students who participated in the survey by type of school and employment status. A significant majority ( $80 \%$ ) of parents, especially fathers of students in government-assisted schools (86\%), was employed while a negligible 1\% was unemployed. One-fifth (20\%) of the students in all schools reported that their mothers were engaged in home duties.

Table 44: Occupational Group of Parents by Type of School

| Occupational group | Type of school |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total |  | Government |  | Governmentassisted |  | Private |  |
|  | Father | Mother | Father | Mother | Father | Mother | Father | Mother |
|  | (1) | (2) | (3) |  | (5) | (6) | (7) | (8) |
| Total <br> Legislators, senior officials and managers Professionals Technicians and associate professionals Clerks Service workers (including defence force) and shop service workers Agricultural, forestry and fishery workers Craft and related workers Plant and machine operators and assemblers Elementary occupations Not stated | (percentage) |  |  |  |  |  |  |  |
|  | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 |
|  | 8 | 7 | 5 | 5 | 12 | 10 | 10 | 8 |
|  | 14 | 20 | 10 | 14 | 21 | 30 | 16 | 19 |
|  | 10 | 5 | 10 | 5 | 12 | 5 | 9 | 8 |
|  | 0 | 5 | 1 | 4 | 1 | 6 | 0 | 7 |
|  | 10 | 16 | 9 | 17 | 10 | 15 | 11 | 17 |
|  |  |  |  |  |  |  |  |  |
|  | 2 5 | 1 0 | 2 6 | 1 0 | 2 | 1 | 2 6 | 1 |
|  | 0 | 0 | 0 | 0 | 1 | 0 | 1 | 0 |
|  | 12 | 7 | 12 | 8 | 12 | 5 | 11 | 8 |
|  | 38 | 38 | 45 | 46 | 26 | 27 | 34 | 32 |

A substantial percentage ( $38 \%$ ) of the sample of form 3 students whose parents were employed did not state their parents' occupations. With regards to the fathers, $14 \%$ were professionals while $12 \%$ were engaged in elementary occupations and $10 \%$ in each case were technicians and associate professionals, and service workers and shop service workers. A larger proportion (21\%) of fathers of students in government-assisted schools were professionals compared to fathers of students in private ( $16 \%$ ) and government ( $10 \%$ ) secondary schools. The data also reveal that one-fifth ( $20 \%$ ) of all mothers, especially in government-assisted schools ( $30 \%$ ), were professionals while $16 \%$ were service workers and shop service workers. The percentage of both fathers (12\%) and mothers ( $10 \%$ ) of students in the governmentassisted schools who were legislators, senior officials and managers, doubled the percentage in government schools (5\%).

Table 45: Ownership of Household Items

| Item | Ownership |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Total | Yes | No | Not stated |
|  | (1) | (2) | (3) | (4) |
|  | (percentage of students) |  |  |  |
| Hot water(water, heater, immersion heater, etc.) | 100 | 75 | 19 | 6 |
| Refrigerator | 100 | 92 | 2 | 6 |
| Washing machine | 100 | 92 | 2 | 6 |
| Microwave | 100 | 85 | 8 | 6 |
| Dishwater | 100 | 35 | 58 | 7 |
| Air condition | 100 | 49 | 44 | 7 |
| Television(not a high definition plasma television) | 100 | 76 | 17 | 8 |
| High-definition plasma television | 100 | 63 | 30 | 7 |
| Cable/Satellite dish | 100 | 74 | 19 | 7 |
| DVD player | 100 | 88 | 6 | 6 |
| Video recorder | 100 | 61 | 32 | 7 |
| Desktop computer | 100 | 72 | 21 | 7 |
| Laptop/Notebook | 100 | 87 | 6 | 6 |
| Internet connection | 100 | 79 | 15 | 6 |
| Telephone line | 100 | 64 | 30 | 7 |
| Digital camcorder | 100 | 59 | 34 | 7 |
| Car | 100 | 76 | 18 | 6 |

In general, the majority of form three students surveyed indicated that their households possessed all of the items listed above except a dishwasher (35\%). With respect to ICT, the data show that a significant percentage of the students indicated that their households had a laptop/notebook (87\%), internet connection (79\%) and desktop computer ( $72 \%$ ).
